

Free Vaccines 4 Life

We believe it is important for EVERY PET
to have a physical examination EVERY YEAR.

So after a one-time fee, if you bring your pet to our veterinarians for their yearly Comprehensive Exam, you will **never** pay for annual core vaccinations again!

How it works:

- You can enroll your pet at any time, even if your pet is not currently due for vaccinations.
- There is a one-time, non-refundable enrollment fee to start the program. Each enrollment fee covers one pet. **This fee DOES NOT TRANSFER to other pets.**
- Current and new clients are welcome and encouraged to enroll their pets regardless of the pet's age. Puppies and kittens can enroll too!
- Once a pet is enrolled, any included core vaccines that we administer are free for that pet's lifetime, as long as your pet has a yearly Comprehensive Exam at Lakeview Veterinary Clinic.

Included Dog Vaccines:

- Rabies
- Distemper
- Adenovirus
- Parainfluenza
- Coronavirus
- Parvovirus
- Bordetella

Included Cat Vaccines:

- Rabies
- Feline Distemper
- Panleukopenia
- Rhinotracheitis
- Calicivirus
- Chlamydia psittaci

Other Benefits of the Free Vaccines 4 Life Program:

- 40% discount on ANY non-core vaccinations recommended based on your pet's lifestyle
- 40% discount on an annual heartworm test for dogs or FeLV/FIV test for cats
- 10% discount on annual fecal testing
- 10% discount on your pet's spay or neuter
- 10% discount on your pet's recommended yearly dental cleaning
- 10% discount on annual Wellness Blood Screening to establish baseline blood values and to detect any changes before clinical symptoms develop, which enhances quality of life and decreases expense of treatment
- 30% discount on the enrollment fee for NEWLY adopted Tazewell and Peoria County shelter animals if seen and enrolled within 14 days of adoption

To keep the enrollment current and valid, bring your pet back to Lakeview Veterinary Clinic each year for its yearly Comprehensive Exam.

Free Vaccines 4 Life Program **\$99***

The earlier you enroll your pet, the more you'll save.

* Price subject to change over time

By offering this program, we can focus on what is truly important to us and to our clients, and that is preventive medicine. We really do want to be “helping pets live the best life possible for as long as possible!” Vaccinations are an important part of that, but the most important component is the Comprehensive Exam.

The yearly Comprehensive Exam alongside Wellness Blood Screenings can uncover very subtle problems before they become larger, more costly problems. Too often we see diseases that have progressed to the point where costly treatment, or even euthanasia, is the best option for the pet’s quality of life. Often, the owner tells us, “If only we could have caught this earlier...” That is so true; if we can detect the very early signs of disease or malfunction, we can provide your pet with a longer life and better quality of life by making small changes to their lifestyle or treatment.

We want to reward our loyal clients who are already taking great care of their pets. It is also a great benefit for new puppy or kitten owners since they visit us at least 3-4 times by the time they are 4 months old. **The program pays for itself within two visits for any pet!**

We are following the American Veterinary Medical Association’s recommendations for the core vaccines. For these diseases, the dangers that the disease would pose to your pet and family are far greater than any risks posed by vaccination. We also include the Bordetella vaccination for those dogs who regularly visit dog parks, dog-friendly stores, doggy day cares, boarding facilities, or grooming facilities.

The Fine Print

- Not all pets need every vaccine available. The veterinarian determines which vaccines your pet needs after evaluating your family and your pet’s lifestyle on a case-by-case basis.
- If you fail to return your pet for its Comprehensive Exam within 14 days of the due date of the Comprehensive Exam, the offer becomes invalid. You will either need to pay for boosters at the current rate or pay a new enrollment fee. However, we do not guarantee that this program will be available in the future, or that the enrollment fee will remain at this price.
- Do not rely solely on your courtesy reminder from us, as Lakeview Veterinary Clinic cannot be held responsible for non-receipt of the reminder (reminders will still be sent 14 days before due as requested on our Treatment Medical Authorization form). To make it easier for you to keep track of when your pet is due for the yearly Comprehensive Exam or any vaccine, you can sign up for a free pet portal through our website. This portal is very user friendly and is a valuable tool in maintaining your pet’s health. You can even schedule your appointment online. Please check it out!
- Free Vaccines 4 Life is per pet, not per client. If you have multiple pets, you may enroll each one provided you pay an enrollment fee for each pet.
- Free Vaccines 4 Life is not transferrable to any other pet or owner and ceases on the loss, death or re-homing of the animal.
- The Free Vaccines 4 Life enrollment fee is non-refundable.
- Comprehensive Exams done at other hospitals will not count toward this program. Likewise, the Free Vaccines 4 Life program is only available at Lakeview Veterinary Clinic and can only be redeemed here.
- Other services and products received or purchased at the time of the visit are NOT free and are an additional cost to the Comprehensive Exam fee. These additional costs include services and products such as non-core vaccinations (including Lyme, leptospirosis, canine influenza, and feline leukemia), medications, heartworm tests, fecal examinations, deworming, flea and heartworm prevention, and feline leukemia/FIV tests.
- Any other exams needed throughout the year will be their own charge, determined by the type of exam.
